

Child and Adolescent Psychopharmacology

Objectives & Accreditation

OBJECTIVES

Upon completion of this program, the participant will have an understanding of the following:

- Presentation, diagnosis and current treatment options available in pediatric psychopharmacology. Issues include:
 - Attention deficit and hyperactivity disorder in childhood, adolescence and adulthood
 - Behavioral problems in childhood and adolescence
 - Pervasive developmental disorders
 - Depression, psychosis, manic depression and anxiety
- Basic neuropharmacology, neuropsychological testing and psychopharmacology of aggression
- Implications of psychiatric genetics for psychopharmacology

ACCREDITATION

Harvard Medical School is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

Harvard Medical School designates this educational activity for a **maximum of 20 hours in category 1 credit*** towards the AMA Physician's Recognition Award. Each physician should claim only those hours of credit that he/she actually spent in the educational activity.

Release date: July 1, 2002
Credits expire: July 1, 2005

*CME credit is obtained upon successful completion of a self-assessment examination. Examination due by July 1, 2005.

Psychologists: American Psychological Association review is pending for continuing education credit for this course. For further information please write or call **Harvard MED-CME, P.O. Box 825, Boston, MA 02117-0825**. Telephone: 617-384-8600, Monday-Friday, 10am to 4pm (Eastern Time).
Email: hms-cme@hms.harvard.edu

Recorded at the live course, March 15-17, 2002

Michael S. Jellinek, M.D.

COURSE DESCRIPTION

This state-of-the-art course has earned widespread acclaim since its first offering in 1995. Dr. Joseph Biederman's distinguished faculty of clinician researchers from the Massachusetts General Hospital Pediatric Psychopharmacology Program are gifted teachers of this new and enormously important discipline.

Rivaling progress in adult psychopharmacology, the field of pediatric psychopharmacology continues its rapid advance. Treatment for childhood and adolescent psychiatric disorders has gained widespread acceptance lending experience which has accelerated the science and art of child and adolescent psychiatry.
