Optional Services

Procedural Supplies Available

Investigators schedule a subject visit in which to perform study activities. In addition, the cost of supplies depends on the supplies required for the study.

Phlebotomy Supplies: Alcohol swab, Vacutainer 8.5cc ACD solution A, multi-sample needle 21G x 1, disposable tourniquet, 2x2 gauze, coverlet adhesive
Prep Lab Supplies: Microcentrifuge 1.5mL screw cap tubes and caps, transfer pipet, centrifuge, balance
Biopsy Supplies: Alcohol swab, betadine swab, TB syringe, Lidocaine, punch biopsy (2mm, 3mm, or 4mm), suture removal kit, 2x2 gauze, steri-strip, triple antibiotic ointment, Falcon test tubes, DMEM solution
Oragene Kit: Oral DNA kit

Professional Services

The facility offers a Medical Assistant, Genetic Counselor, and Grant Advisor, who are available on a per-hour basis. Investigators can also consider using the Tissue Culture Core conveniently located in the Simches Research Building for transformation of cell lines and direct blood DNA extraction. Contact Diane Lucente (dlucente@partners.org) for additional information. The MGH Clinical Research Program (CRP) offers experienced study coordinators on a part time basis to manage day-to-day study activities including IRB submissions. Contact Kay Ryan for more information (kryan10@partners.org) or see The CRP's website <http://www.massgeneral.org/crp/>
