

MASSACHUSETTS GENERAL HOSPITAL CANCER CENTER

An integral part of one of the world's most distinguished medical centers, the Massachusetts General Hospital Cancer Center is chosen by more cancer patients than any other hospital in New England. Its commitment to eradicating cancer is fueled by scientific investigation conducted as part of the largest hospital-based research program in the United States.

Known for providing individualized, compassionate care to both adults and children, the Cancer Center comprises 18 fully integrated, multidisciplinary clinical programs and a vast network of support and educational services.

The Cancer Center is consistently ranked as one of the best in the country by U.S. News & World Report. Its nurses were the first in the state to achieve Magnet status in recognition of the hospital's exceptional nursing care.

Through a powerful synergy between scientists in the laboratories and physicians at the bedside, the Cancer Center fosters innovation in basic, translational and clinical research.

It is a founding member of the DF/HCC, a Harvard Medical School consortium designated by the National Cancer Institute as a comprehensive cancer center. This prestigious seven-member center forms the largest cancer research collaboration in the country.

Massachusetts General Hospital Cancer Center and Dana-Farber/Brigham and Women's Cancer Center collaborate on joint clinical trials, education, training programs and quality of care improvements.

HOT TOPICS IN ONCOLOGY CARE - A PROGRAM FOR THE ADVANCED PRACTICE CLINICIAN

Saturday,
March 7, 2009

Massachusetts General Hospital Cancer Center • Simches Building • 185 Cambridge Street • Boston, MA

MASSACHUSETTS
GENERAL HOSPITAL

CANCER CENTER

OBJECTIVE

This one-day seminar will provide up-to-date information on current practice trends in oncology for the advanced practice clinician. Discussion will focus on care of the complex oncology patient. Topics will include radiologic review, dermatology, hematology, basics of immune-directed therapies, and psychosocial aspects of cancer. Each segment will be followed by a detailed discussion with an expert panel.

This course is designed for nurse practitioners, clinical nurse specialists and physician assistants, in addition to nurses with an interest in oncology.
